

Groundsafe

Groundsafe is an easy to install, impact absorbing rubber matting for safe and secure surfacing in playgrounds and other outdoor public areas. The moulded anti-slip cellular structure allows grass to penetrate, establishing a firm bond to the ground and effectively hiding the matting. The matting also provides excellent anti-fatigue benefits and enhanced ground drainage and erosion protection in areas of frequent use. Groundsafe has a straight edge design which allows the mats to be joined together using the connectors to cover large areas.
