

# Body Fluid Kit

Total incident clean-up kit designed to enable full response to incidents involving bodily fluids including blood, urine, vomit faeces etc.

This Kit contains BFP/240 Body Fluid Powder to absorb unpleasant or hazardous body fluids and kill harmful organisms, eliminating the risk of cross infection easing disposal. BFP/240 Body Fluid Powder may be applied directly onto accidental spills of blood, urine, vomit and diarrhoea and is ideal to have on hand in hospitals, nursing homes, ambulances, police cells, canteens, colleges, universities or any other place large groups of people gather and cross infection is possible. BFP/240 Body Fluid Powder contains 1% sodium dichloroisocyanurate which is regarded by many, including the world health organisation, the health service and the government as the most effective broad spectrum disinfectant against bacteria and viruses including H.I.V and hepatitis 'b'. BFP/240 Body Fluid Powder absorbs 30 times its own volume, is pleasantly perfumed and covers spill making them visually less offensive.

- For dealing with incidents involving blood, vomit, urine faeces etc.
- Ideal for catering and service industries
- Compact and self-contained
