

**BRIEF DESCRIPTION:**

Absorbent/Steriliser 400g Shaker

DESCRIPTION:

BFP/240 Body Fluid Powder may be applied directly onto accidental spills of blood, urine, vomit and diarrhoea and is ideal to have on hand in hospitals, nursing homes, ambulances, police cells, canteens, colleges, universities or any other place large groups of people gather and cross infection is possible.

BFP/240 Body Fluid Powder contains 1% sodium dichloroisocyanurate which is regarded by many, including the world health organisation, the health service and the government as the most effective broad spectrum disinfectant against bacteria and viruses including h.i.v and hepatitis 'b'.

BFP/240 Body Fluid Powder absorbs 30 times its own volume, is pleasantly perfumed and covers spill making them visually less offensive.
